Douro, Portugal

Region and Vineyards

The **Douro Superior**, the easternmost subregion of the **Douro Valley**, is characterized by its extreme climate and dramatic landscapes. Known for its hot, dry summers and cold winters, this area allows for the production of concentrated and expressive wines.

The grapes for this wine are sourced from **Quinta do Orgal**, a vineyard certified as organic. The vines are cultivated along steep terraces with **schist soils**, which retain heat and reflect it back to the vines, promoting optimal ripening. The Douro River nearby moderates temperatures, ensuring freshness and balance in the fruit. These conditions contribute to the bold, aromatic character of the wine.

Winemaking

Each grape variety is vinified separately at Quinta do Vallado's state-of-the-art facility. The fermentation takes place in **stainless steel vats**, with controlled temperatures and regular remontage (pump-overs) to enhance extraction.

After fermentation, the wine is aged for **16 months in used French oak barrels**, allowing the tannins to soften and the wine to develop complexity without overwhelming the fruit. The organic certification of the vineyards ensures sustainable practices, respecting both the environment and the purity of the grapes.
