Victoria, Australia

Region and Vineyards

The vineyard is densely planted with **7,300 vines per hectare**, earning its name "Tout Pres," which translates to "very close" or "very cosy." This high-density planting forces the vines to compete, resulting in low yields but high-quality fruit. The clones planted here, including 113, 114, 115, 667, 777, and MV6, have begun to adapt and mutate, creating what is now known as the "Tout Pres clone."

Winemaking

The vinification of By Farr Tout Pres Geelong Pinot Noir follows the same meticulous process as other By Farr Pinot Noirs. The wine is **fermented with 100% whole bunches** in a five-tonne oak fermenter, allowing for maximum flavor extraction and complexity. This particular Pinot Noir has the largest flavor profile and intensity among By Farr's Pinots, enabling it to absorb the influence of **100% new French oak from Allier**.

The wine undergoes natural fermentation and is aged in these new oak barrels, which contribute to its richness and depth. The result is a wine with understated power and richness, described as having a "classic peacock's tail" – a reference to its broad, layered finish.
