Salta, Argentina

Region and Vineyards

The **Amalaya Corte Unico Finca San Isidro** hails from the Cafayate Valley in the Salta province of northern Argentina. This region is renowned for its dramatic landscapes, with vineyards situated at altitudes ranging from **1,600 to 2,000 meters** above sea level. The high altitude and unique microclimate contribute to the development of intense, concentrated flavors in the grapes.

The vineyards of **Finca San Isidro** are characterized by their rocky, alluvial soils, which provide excellent drainage and reduce vine vigor, leading to lower yields of high-quality fruit. These conditions, combined with the intense sunlight and cool nighttime temperatures, result in grapes that achieve optimal ripeness while retaining their natural acidity.

Winemaking

The **Amalaya Corte Unico Finca San Isidro** is a blend of **90% Malbec, 5% Cabernet Sauvignon, and 5% Tannat**. The grapes are meticulously harvested at different times to ensure each variety reaches its peak maturity. Malbec is picked in early March, while Cabernet Sauvignon and Tannat are harvested at the end of March.

Fermentation occurs in new barrels, followed by aging for **12 months in French oak**. This process enhances the wine's structure and complexity, imparting subtle oak flavors and allowing the wine to develop a unique character that is both elegant and powerful.
